

ABSTRACT

[0128] A system and method for creating a proxy object capable of communication with an external entity, comprising specifying a proxy object definition for the proxy object wherein the proxy object definition defines a first function for communicating with the external entity, specifying at least one implementation class for the proxy object definition, wherein the at least one implementation class does not implement the first function, and wherein the at least one implementation class includes functionality to support one of: proxy object design, software compilation and software execution.
